

Handbrake: How to Compress Video Files

Download and Install - <https://handbrake.fr>

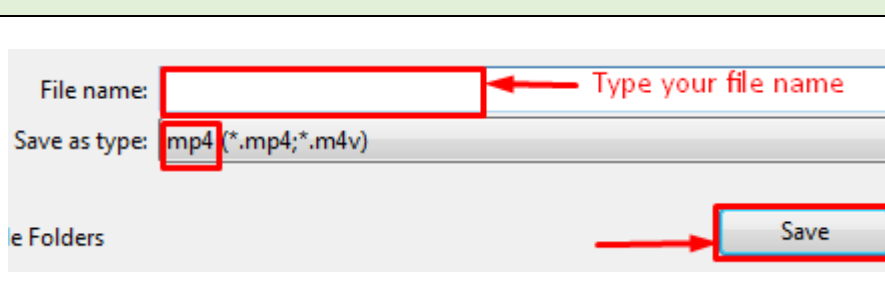

1] **Source** > **File** > select the original video file > Open

2] **Browse** for a new output file's destination folder (bottom right)

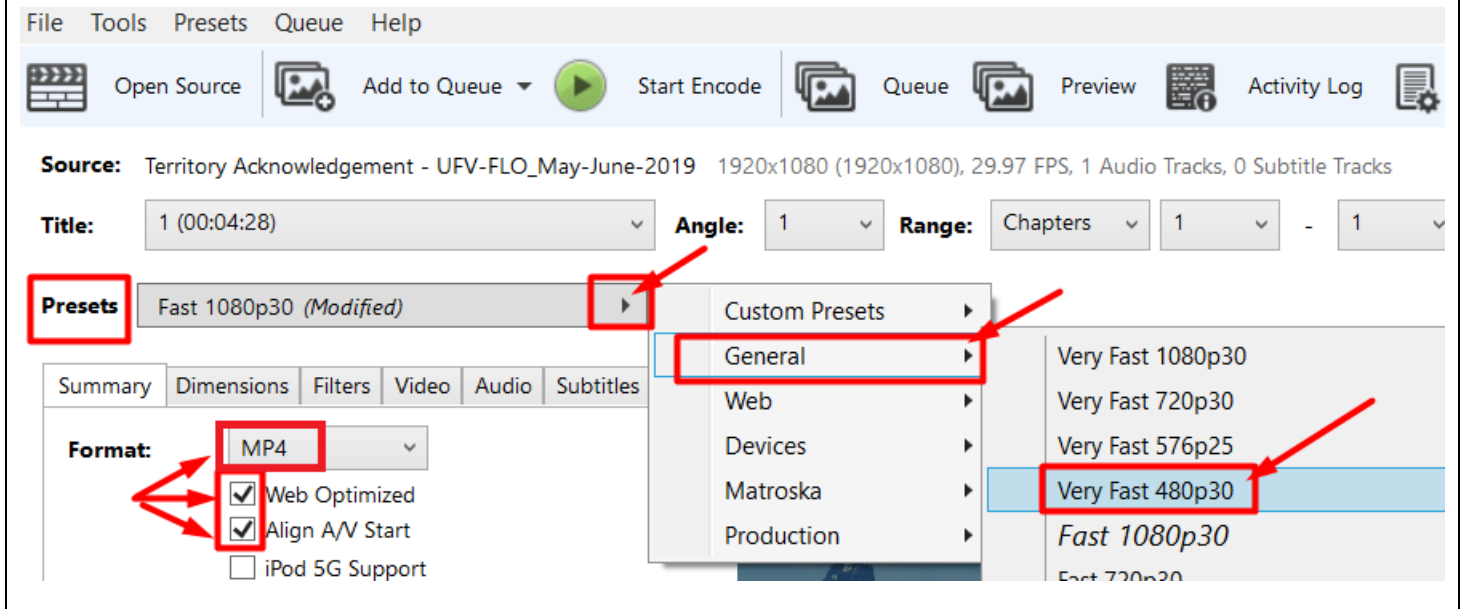

3] Type the new output file name > **Save**

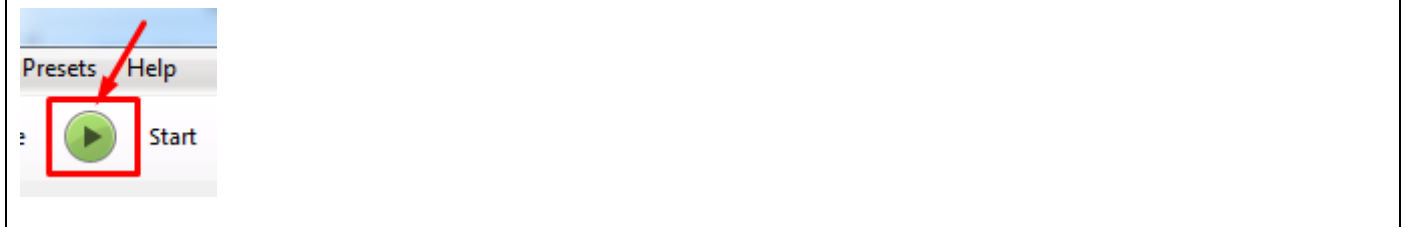

4] Presets > General > Very Fast 480p30

Summary tab > Format > MP4 > Web Optimized & Align A/V Start

5] Start button

6] When "Queue Finished" appears at the bottom left, check the new output file.

Optional: **Open Source** if you'd like to compress another file.
